

1. Draw and label a cell describing what happens in each of the three stages of cell cycle.

**Stage 1**

**Stage 2**

**Stage 3**

2. what happens to DNA during the first stage of cell cycle?

.....

3. what happens to protein & mitochondria numbers in first stage of cell cycle

.....

4. describe what happens to the size of the cell during the first stage of cell cycle

.....

5. describe what happens during the second stage of cell cycle

.....

.....

.....

.....

.....

.....

.....

6. describe what happens to a cell during the third stage of cell cycle

.....

.....

.....

7. how does cell cycle lead to one cell becoming two identical cells? (6)

.....

.....

.....

.....

.....

.....

.....

.....

.....
