

Velocity
(m/s)

- Calculate the distance travelled by:
 - object A
 - object B
 - object C
- Calculate the acceleration:
 - object A
 - object B
 - object C

Velocity
(m/s)

- Which object(s):
 - is moving at a constant velocity?
 - show an acceleration during their journey?
 - is stationary throughout their journey?
 - have no resultant forces acting on them?
 - have a resultant force acting on them?
