

Making Potable Water

1. What is fresh water?

.....

.....

.....

2. What is an aquifer?

.....

.....

.....

3. What impurities does fresh water contain that makes it unsafe to drink?

.....

.....

.....

4. What is potable water?

.....

.....

.....

5. What happens in sedimentation?

.....

.....

.....

6. What happens in filtration?

.....

.....

.....

7. What happens in chlorination?

.....

.....

.....

8. Why can sedimentation, filtration or chlorination not be used to separate dissolved substances from fresh water?

.....

.....

.....

.....

.....

.....

9. What process is used to separate dissolved salts from drinking water?

.....

.....

.....

.....

.....

.....
