

7. Calculate the percentage change in mass for each potato in the different sugar concentrations

Sugar conc. (mols)	Initial mass (g)	Final mass (g)	% change in mass
0	8.2	10.3	
0.2	8.3	9.1	
0.6	8.1	6.6	
0.8	8.2	5.7	
1.0	6.1	3.0	

8. Plot a graph for the percentage change in mass against sugar concentration

9. State the estimated sugar concentration of the potato
